DETAILED ACTION

Reasons for allowance

The following is an examiner's statement of reasons for allowance: The invention is directed to methods for the manufacture of polytrimethylene ether glycol by providing (1) 1,3-propanediol reactant selected from the group consisting of 1,3-propanediol and/or oligomers or prepolymers of 1,3-propanediol having a degree of polymerization of 2-9 and mixtures thereof, (2) a polycondensation catalyst, and (3) 20 weight % or less of comonomer diol; and polycondensing the 1,3-propanediol reactant to form a polytrimethylene ether glycol at less than one atmosphere pressure. The claims are further directed to polytrimethylene ether glycol of molecular weight greater than 1,500 and a polydispersity of 1.5 to 2.1. The prior art references of record do not teach or fairly suggest a process that utilizes the starting materials in combination with a polycondensation step conducted under reduced pressure, or the resulting polymers having the claimed molecular weight and dispersity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irina S. Zemel whose telephone number is (571)272-0577. The examiner can normally be reached on Monday-Friday 9-5.
